

TRAINING MATTERS

EDUCATION CREATES POSITIVE CHANGE

Each year, Noria trains thousands of people around the world – and in more than 10 different languages – on the topics of machinery lubrication, contamination control and oil analysis. We hold monthly public trainings throughout the world, send instructors to customer sites for private training and offer online courses for your convenience.

We have a course for every need and situation.
Find your perfect fit.

CERTIFICATION SERIES

Machinery Lubrication I provides the essentials of proper lubricant application while instilling proven industry methods for selecting, storing, filtering and testing lubricants for improved machine reliability. With this course, individuals will move beyond the dated methods of vague, non-specific lubrication procedures to understand what to do and why there is a right way to do it.

ML I is available online, onsite, as a public course and through Enterprise Solutions.

Get Certified

Machinery Lubrication I prepares students for ICML Level I MLT I and Level I MLA I certification and aligns with ICML MLE certification.

Machinery Lubrication II covers advanced lubrication topics like lubricant selection, troubleshooting, predictive maintenance and more. Designed for maintenance professionals with a solid understanding of the benefits and potential excellence in lubrication best practices, this course builds upon their knowledge and provides an in-depth look into the world of lubrication.

ML II is available online, onsite, as a public course and through Enterprise Solutions.

Get Certified

Machinery Lubrication II prepares students for ICML Level II MLT II certification and aligns with ICML MLE certification.

Oil Analysis II approaches lubrication excellence through the critical information to be gleaned from oil analysis. In this course, individuals gain everything needed to properly sample, monitor lubricant health and detect the factors that degrade lubricants via onsite tests and lab analysis. Armed with this information, students will develop a proactive line of defense against failures, factoring lab findings into their own onsite analyses for more precise, timely maintenance.

OA II is available as a public and onsite course.

Get Certified

Oil Analysis II prepares students for MLA II certification and aligns with ICML MLE certification.

Oil Analysis III gives a more in-depth look into this specialized field by introducing the tools and education to develop, implement and sustain a first-rate, comprehensive oil analysis program. This course shows individuals how to compare detection and cost benefits/drawbacks for any type of lab test to select the most precise options for their needs. Students will also gain strategies for applying data and analysis to build strong proposals for improvement projects and calculate accurate return on investment.

OA III is available as a public course.

Get Certified

Oil Analysis III prepares students for MLA III certification and aligns with ICML MLE certification.

WORKFORCE DEVELOPMENT

Industrial Lubrication Fundamentals is the starting point for individuals with all levels of mechanical or maintenance experience. This essential course provides strong techniques and perspective for those with some lubrication knowledge, while presenting sound practical material and instructions for those starting their journey in the field.

Industrial Lubrication Fundamentals is offered onsite.

Hands-on Excellence in Lubrication Program (HELP) Training

is an option for facilities that have completed or are currently undergoing Noria's Lubrication Program Development (LPD). HELP Training is a critical step in deploying and sustaining a lubrication program. When lubrication tools arrive onsite, so does Noria. When we leave, the lubrication champions take program ownership, train new personnel and periodically audit skills for the in-house lubrication and maintenance teams. HELP Training is designed for a maximum of nine people.

HELP Training is offered onsite.

On-The-Job Lubrication Technician Training

is designed to be hands-on, in-plant instruction. It engages individuals by showcasing best practices on their equipment, creating awareness of poor lubrication practices and offering solutions to improve. A Noria instructor observes the lubrication practices of the team, then coaches and trains to best practices. The training concludes with a close-out meeting that provides observations related to the current state of the lubrication program and offers recommendations for improvement. This small-group training includes the use of noise-cancelling headsets with a microphone to provide the capability to communicate effectively in a noisy plant environment.

On-the-Job Lubrication Technician Training is offered onsite.

SPECIAL TOPICS FOR PROFESSIONAL DEVELOPMENT

Oil Analysis Report Interpretation Workshop

takes the mystery out of oil analysis reports by giving individuals the tools to interpret those reports and translate the data into useful action. Students will receive help and guidance in extracting important and useful data from reports while also obtaining practical strategies for implementing actionable maintenance decisions. In this course, individuals are encouraged to bring their own oil analysis reports, although it is not required.

Oil Analysis Report Interpretation Workshop is available as a public or onsite course.

Food Processing Equipment Lubrication

focuses on preparing facilities for developing compliant standard operating procedures to ensure compliance with the Food Safety Modernization Act (FSMA). This online course helps facilities establish a plan for assessing current food-grade lubricant use as well as conducting a Hazard Analysis and Critical Control Points (HACCP) review of their lubrication program to prepare for an FDA inspection.

Food Processing Equipment Lubrication is available online and through Enterprise Solutions.

RESOURCES

NORIA ACADEMY

Free with the purchase of any Noria certification course

To aid in retention and create an innovative student experience, we offer the Noria Academy app. With a robust and responsive design, the Noria Academy app features different study modes, including flash cards with the ability to sort cards by confidence level and specific topics, as well as practice exams with multiple-choice questions from all topic areas.

The app also makes it easy to prepare for certification exams, such as the International Council for Machinery Lubrication's Level I and II Machinery Lubrication Technician (MLT I/MLT II) certification, and Level II Machine Lubricant Analyst (MLA II) certification, in addition to other reliability certifications.

STUDY AIDS

Noria offers a variety of study aids to help prepare you for ICML certification. These study aids include:

- Level I MLT / Level I MLA Study Packet
- Level I MLT / Level I MLA Practice Exam
- Level II MLT Flash Cards
- Level II MLT Practice Exam
- Level II MLA Flash Cards
- Level II MLA Practice Exam
- Machinery Lubrication Reference Guide
- And more!

ICML ALIGNMENT

Noria offers several courses that prepare individuals for certification through the International Council for Machinery Lubrication (ICML).

Machinery Lubrication I trains students for certification as a Level I Machinery Lubrication Technician, while Machinery Lubrication II equips students for the Level II Machinery Lubrication Technician certification. Oil Analysis II readies students for the Level II Machine Lubricant Analyst certification, and Oil Analysis III prepares students for the Level III Machine Lubricant Analyst certification.

Machinery Lubrication I and II, Oil Analysis II and III, and Food Processing Equipment Lubrication also train students for ICML's Machinery Lubrication Engineer certification.

TRAINING SUPPORT AND SERVICE

Noria is dedicated to the continuous development of your lubrication-based reliability skills. Ready to start your journey but unsure of the courses you need? Or perhaps you have questions about a specific course? Our training advisors will be happy to analyze your needs and advise you on the best training options for you and your organization. Ready to find your perfect fit? Contact a Noria training advisor today at +603-3323 8999
